Avira Battle Card
Panda Security

AVIRA

Why Avira?

Avira provides dependable malware protection to computers, servers and networks both on-site and in the cloud. The company stands for internet freedom around the globe. Because of Avira's security expertise and award-winning antivirus software, today more than 100 million consumers and small businesses enjoy freedom from viruses, spam and other internet-based threats.

Efficiency | Reliability | Security

- No Backdoors!
- The only German AV Vendor
- More than 25 years of experience
- Minimal impact on the system
- All licenses include free updates and upgrades
- Virus definition updates delivered in small files for reduced download volume
- 24/7 Avira Support (optional)
- Industry-leading scanning speed and accuracy
- Very few false positives

Benefits in comparison with Panda Security:

Client solution
- Up to 5 rule-based configuration policies per client
- Generic detection and repair
- Intuitive and clearly structured GUI
- Simple module configuration
- No mandatory online license activation

Server solution
- Scanning of offline VMware images

Management Console
- Intuitive and easy to use
- Management configuration is identical to client and server configuration (due to GUI Plugins)
- Roaming users based on IP-Range filters (mobile clients will be automatically moved to the right security group)

Avira: Tested and certified by leading professional institutes

AV Comparatives:

A long string of **Advanced+** ratings can only point to one thing: superior value and performance overall. So it's no surprise that Avira took home AV-Comparatives' "Top Rated Product" award award for 2011 among other top honors in the institute's annual review:

Gold Winner: Proaktive On-Demand Detection
Silber Winner: On-Demand Malware Detection
Bronze Winner: Overall Performance

The word is out:
Avira's combination of strong protection and streamlined performance is second to none.

Detection of malware

Proactive detection
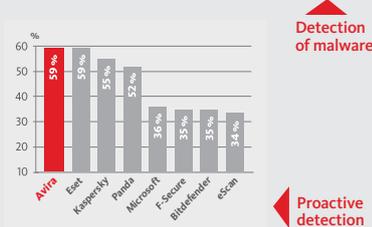

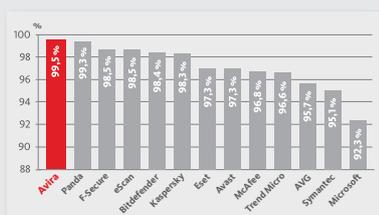

Virus Bulletin:

In recent years, each independent review has reinforced a simple fact: Avira's server security product keeps moving farther ahead of the competition. The Virus Bulletin in February 2012: "Detection rates were pretty splendid, with a superb showing in the Response tests, and excellent scores in the RAP tests too, dropping a little in the proactive week but remaining impressive even there. No problems were noted in the certification sets, and a VB100 award was easily earned, **maintaining Avira's clean sweep with 12 passes out of 12 in the last two years**."
